characteristic is readability and the first relation is overlapping; displaying information from a plurality of calendars in a calendar interface, wherein the color from the range of colors is associated with one of the plurality of calendars and wherein the plurality of user interface elements displayed using the plurality of colors is associated with the one of the plurality of calendars; and selecting an arbitrary color as the color from the range of colors for the one of the plurality of calendars" as cited in claims 1, 17, 33, 49, 55, and 61 in combination with the other claimed features.
